

# CHASE ALBRIGHT

Houston, TX · (713)-504-0132

[Chasemalbright33@gmail.com](mailto:Chasemalbright33@gmail.com)

I am Chase Albright. I am looking to broaden my experience in various scientific and engineering fields in order to help people and solve problems that our world faces. I love building things and my goal is to make those around me better.

## EXPERIENCE

**MAY 2018 – AUGUST 2018**

**INTERN, GENSCAPE**

Genscape is a data analytics firm. During my time at Genscape, we used Python to develop a ML (machine language) program to analyze video footage and automatically count the number of Tesla cars that were being produced at the Fremont factory in California. This data was then consolidated into a report and sold to investment firms.

**MAY 2020 - AUGUST 2020**

**INTERN, 4-TOWER**

4-Tower has a web app for hospitals that aids in product procurement and organization. During my time at 4-Tower, I used Angular.JS to help debug UX elements, add features, and maintain the product database. I also learned how a SaaS start-up is run and operated.

## EDUCATION

**MAY 2020**

**FOSTER HIGH SCHOOL**

Salutatorian of 520 students

**AUGUST 2020 -**

**COMPUTER ENGINEERING, TEXAS A&M UNIVERSITY**

I am a freshman pursuing a degree in computer engineering

## SKILLS

- Python programming
- Angular/React for web development
- Git version control
- Intermediate knowledge of chemistry
- Microsoft Word, Excel, Power Point, Outlook
- HTML/CSS/JS
- Social media
- Webflow design
- Knowledge of Raspberry pi systems

## PROJECTS

- Check out my personal website with all my projects! [www.chasealbright.com](http://www.chasealbright.com)
